

eXperience Designer- Omniture Integration Team

Adobe believes in hiring the very best. We are known for our vibrant, dynamic and rewarding workplace where personal and professional fulfillment and company success go hand in hand. We take pride in creating exceptional work experiences, encouraging innovation and being involved with our employees, customers and communities. We invite you to discover what makes Adobe such a great place to work.

Job description

By joining the Omniture Integration Team in Romania you will contribute to the process of shaping and deciding tomorrow's technologies and solutions that make it easy to deliver measure and track, target and or test online content using HTML or the Flash Platform.

An eXperience Designer is focused on usability, design and prototyping of workflows and graphical interfaces.

Responsibilities

- Closely collaborate with the UI lead for the project
- Be and **advocate for the user**; provide product usability evaluation and support for development areas. This includes the analysis of applications/systems, graphics, web, multimedia and user interaction.
- May **develop user profiles**, with emphasis on design issues, visual interaction, human error control, task objective analysis
- Would develop and apply software design/usability processes in the investigation of technical problems; produce specification providing user requirements and internal structures for product in development
- Would strive to **generate crisp, innovative and elegant design solutions**.
- Would **describe abstract concepts** through writing, diagramming, sketching and prototyping
- Would create, **evaluate and modify prototypes** to support evolving software application development
- May assist in developing **design concept and implementation**, providing input on user design considerations
- Would work with **a team of designers, engineers and product managers** in order for your design to meet also business objectives and technical considerations. You would need to be able to communicate clearly and make well-founded decisions.
- Should facilitate the exploration **and understanding of problem's space** and drive to get to the heart of the problem. You should be able to move easily between the forest and the trees and have a keen understanding of **what level of detail is appropriate at a given time**.

Previous experience

For this job we are searching for people with the skills and knowledge listed below. However, if you are an excellent engineer with deep understanding of the software development lifecycle and you are confident you can quickly pick up any of them, we would love to hear from you.

- **at least 2 years** of professional software design experience
- experience in either Flash prototyping of visual design and the desire to master both
- thorough understanding of user experience design for interactive desktop products and rich internet applications
- excellent interpersonal skills and the ability to communicate effectively with people from different fields, like engineers and managers
- studies in Human Computer Interaction, Graphic Design, Usability of related field are a big plus

Nice to have:

- Experience in using Flash Pro
- Experience with agile development methodologies

Personal:

- Strong interpersonal and communication skills
- Ambitious and self-driven
- Pro-active and detail-oriented
- Fluent in English (both written and spoken)
