

Quality Assurance Engineer - Technology and Software Innovation Group

Send your resume to: hr-romania@adobe.com

Position summary

The goal of the TXI is to drive consistent thought-leadership across the Adobe Technical Services in creating innovative experiences upon Adobe technology and user-experience design. As importantly, a goal of the TXI is to ensure that irrespective of where a customer is in the customer lifecycle - pre-sales, professional service delivery, post-sale support or customer care, we are providing a consistent message and methodology to helping our customers to be successful upon innovative solution delivery upon Adobe technology. In support of delivering this best-imaginable customer experience, both to our customers and - through the solutions we enable them to deliver - their customers and end-users, TXI is also responsible for ensuring that the tools, products and services that we develop to support our ability to deliver and support innovative solutions on both sides of the glass with Adobe technology, are themselves examples of the kind of innovation that can occur when we apply user-experience design with Adobe technology
