

Quality Engineer – Omniture Integration Team

Recognizing that employees are at the core of our success, Adobe recruits and retains highly qualified and motivated individuals, creates an environment where they can innovate and achieve their best, and rewards them for their performance by giving them an opportunity to share in the company's success. You will be working in the cool and demanding office in Bucharest together with some of the best software and quality engineers.

Job description

By joining the Omniture Integration Team in Romania you will contribute to the process of shaping and deciding tomorrow's technologies and solutions that make it easy to deliver measure and track, target and or test online content using HTML or the Flash Platform.

The role includes developing unit tests, automation scripting and end-user manual testing with a big focus on Flash Platform. It will also involve working with 3rd party content and solution providers to vet and test standards for content delivery and measurement.

On this job, you:

- Will make sure the project **meets the quality expectations of the end-user** and the company standards
- Will **perform** user, workflow and scenario testing
- Will **advocate for the user**; provide good argumentation and feedback to the development team
- Will **work closely with the software developers** to design product specifications
- Will write and maintain **test specifications**
- Will **write and execute automated test procedures**
- Will **work with a team of quality engineers and software engineers**. You need to be able to clearly communicate user and business impact and make well-founded decisions

Previous experience

For this job we are searching for people with the skills and knowledge listed below. However, if you are an excellent Quality Engineer with deep understanding of testing methodologies and the software development lifecycle and you are confident you can quickly pick up any of them, we would love to hear from you.

- Education in Computer Science, Engineering or equivalent; (B.S. or M.S. degree is a plus)
- 3 to 5 years of industry experience, **at least 3 years experience in quality assurance**
- Good problem solving and diagnostic skills, experience with troubleshooting and software testing
- Familiar with scripting languages (Perl, Python, bash) or coding for web apps (such as JavaScript, Visual Basic, ActionScript, PHP, etc.);
- Familiar with automated testing tools

- Knowledge of **web technologies** (HTTP, XML, SOAP, REST, Java/ PHP/ .NET, etc) is a plus
- Excellent written and verbal communication skills
- Good English language knowledge, written and spoken

Bonuses & benefits

We offer the opportunity to build a career in a rapidly expanding software company, working with international technology groups. Excellent [benefits package](#) including [Stock Options Plan](#), Medical and Life insurance, and more.
