

## Quality Engineer Team Lead - Rich Media Solutions Team

Recognizing that employees are at the core of our success, Adobe recruits and retains highly qualified and motivated individuals creates an environment where they can innovate and achieve their best, and rewards them for their performance by giving them an opportunity to share in the company's success. You will be working in the cool and demanding office in Bucharest together with some of the best software and quality engineers.

### Job description

By joining the Rich Media Solutions Team in Romania you will contribute to the process of shaping and deciding tomorrow's technologies and solutions that make it easy to deliver, measure and protect video content online using the Flash Platform. You will contribute to projects like Open Source Media Framework (for delivering high-quality, full-featured playback experiences), Flash Access (for content protection) and other new initiatives.

Send your resume to: [hr-romania@adobe.com](mailto:hr-romania@adobe.com)

### Position summary

As a team lead you will lead a small team, driving a short-term project or owning a product area of a bigger project. The role requires both project management efforts and testing efforts. You will be expected to drive and handle most of, if not all of, the interactions with the different stakeholders regarding the project/product area you are leading.

### On this job, you will:

- Actively participate in estimating the testing effort, overseeing the planning for the project/product areas you'll lead
- Provide team and feature status to management regularly, effectively raising issues to management
- Participate in the communication with the product manager and other stakeholders to define and clarify technical requirements
- Make sure the project meets the quality expectations of the end-user and the company standards
- Perform user, workflow and scenario testing
- Advocate for the user; provide good argumentation and feedback to the development team
- Work closely with the software developers to design product specifications
- Write and maintain test specifications
- Write and execute automated test procedures
- Work with a team of quality engineers and software engineers. You need to be able to clearly communicate user and business impact and make well-founded decisions

## **Previous experience:**

For this job we are searching for professionals that meet the following criteria:

- Education in Computer Science, Engineering or equivalent; (B.S. or M.S. degree is a plus)
- 4 to 6 years of industry experience, at least 3 years experience in quality assurance
- Solid foundation in testing and quality assurance practices and methodologies
- Good problem solving and diagnostic skills, experience with troubleshooting
- Ability to plan, document and monitor status of testing performed by multiple people
- Ability to challenge and empowers team members
- Ability to proactively deal with issues before they arise
- Familiar with scripting languages (Perl, Python, bash) or coding for web apps (such as JavaScript, Visual Basic, ActionScript, PHP, etc.);
- Familiar with automated testing tools
- Knowledge of client-server architectures or web technologies (HTTP, Java/ PHP/ .NET, etc) is a plus
- Good SQL knowledge is a plus
- Excellent written and verbal communication skills
- Good English language knowledge, written and spoken
